

# Weekly Report

Lu Junhua

2016 年 5 月 15 日

## Done

- Finished reading the first four chapters of PROFESSIONAL JAVASCRIPT FOR WEB DEVELOPERS, learned many details which I haven't heard before in js.
- Finished one assignment of applied mathematics of computer science; and a presentation of 中国特色社会主义理论.
- Select the paper to be presented in next week's group meeting. Read the chapters before visual design.
- Finish majority of patents, one on the system and the other on the regression model.
- MISCELLANEOUS: hand written 入党申请书 and four pieces of 思想汇报s. Checked no changes on the survey in FCS. Accompany my girlfriend to inject rabies vaccine for she was bitten by a dog.

Obviously I have spent much time on many matters which do not have much relations with the research of our lab. I believe this situation would be changed after this month.

## To do

- Prepare for the group meeting representations.
- Finish more course assignments.
- Read papers: PacificVis2016: A Visual Analytics Approach to High-Dimensional Logistic Regression Modeling.
